

The *Journal of Engineering Education* is a peer-reviewed international journal devoted to scholarly research in engineering education. The journal is published quarterly by the American Society of Engineering Education in partnership with five other national and international engineering education societies and associations.

Founded in 1893, the American Society for Engineering Education (ASEE) is a nonprofit organization of individuals and institutions committed to furthering education in engineering and engineering technology. It accomplishes this mission by promoting excellence in instruction, research, public service, and practice; exercising worldwide leadership; fostering the technological education of society; and providing quality products and services to members. <[www.asee.org](http://www.asee.org)>

The Indian Society for Technical Education (ISTE) is a national, professional, non-profit society whose major objective is to assist and contribute in the production and development of top quality professional engineers and technicians needed by the industries and other organizations. Established in 1941, and being the only national organization of educators in the field of engineering and technology in India, ISTE also contributes in various missions of the Union and State governments. <[www.isteonline.org](http://www.isteonline.org)>

Founded in 2002, the Latin American and Caribbean Consortium of Engineering Institutions (LACCEI) is a non-profit organization of Latin American and Caribbean (LAC) institutions offering academic programs in engineering and technology as well as other institutions from other parts of the world with interests and activities with LAC institutions. Its mission is to be the leading organization of LAC engineering institutions fostering innovations in engineering education and research and partnerships among academia, industry, government, and private organizations for the benefit of the society and the nations. <[www.laccei.org](http://www.laccei.org)>

The Asociación Nacional de Facultades y Escuelas de Ingeniería (ANFEI), or the National Association of Engineering Colleges and Schools, is a Civil Association of institutes, colleges and schools of engineering in México. Founded in 1964, ANFEI supports institutions of higher education devoted to engineering teaching, improvements in teaching methods, and a humane and ethical education and whose goals are to prepare engineers with the skills, attitudes, and values for effective professional performance. <[www.anfei.org.mx](http://www.anfei.org.mx)>

The Australasian Association for Engineering Education (AAEE) is a professional association committed to improving the quality, relevance, and performance of engineering education in Australasia. Established in 1989, AAEE brings together people across Australia and New Zealand interested in engineering education excellence, including engineering academics, academics from other disciplines, and vocational educators, engineering support staff and librarians, and postgraduate engineering students, professional engineers, employers. <[www.aee.com.au](http://www.aee.com.au)>

The Internationale Gesellschaft für Ingenieurpädagogik (IGIP), or the International Society for Engineering Education, was founded in 1972. The aims of IGIP are to improve teaching methods in technical subjects, develop practice-oriented curricula that correspond to the needs of students and employers, encourage the use of media in technical teaching, integrate languages and the humanities in engineering education, foster management training for engineers, promote environmental awareness, and support the development of engineering education in developing countries. <[www.igip.info](http://www.igip.info)>
